

EUROPEAN RADIOCOMMUNICATIONS COMMITTEE

ERC Decision
of 20 March 1998
on free circulation and use of EMS-PRODAT terminals
in CEPT member countries
enlarging the field of application of ERC/DEC/(95)01
(ERC/DEC/(98)03)

EXPLANATORY MEMORANDUM

1 INTRODUCTION

The ERC/Decision/(95)01 identifies three levels of free circulation of radio equipment in CEPT member countries as follows:

1. free circulation without permission of using the radio equipment;
2. free circulation with permission of using the radio equipment;
3. free circulation with the permission of placing the radio equipment on the market.

The ERC/DEC/(95)01 only covers levels 1 and 2 on free circulation of GSM and DECT mobile equipment, Omnitrac terminals for the Euteltracs system, Inmarsat-C terminals, Inmarsat-M terminals and PR-27 mobile stations.

This new Decision, however, deals with only the level two of free circulation since level one is already covered by ERC/DEC/(95)01.

2 BACKGROUND

It is a general aim of the European Radiocommunications Committee (ERC) to facilitate the free circulation of radio equipment.

The aim of this Decision is to allow the free circulation of EMS-PRODAT terminals in the same way as ERC/DEC/(95)01 does for the radio equipment categories identified therein.

Separate Decisions have been made for free circulation and use of other categories of equipment.

3 REQUIREMENT FOR AN ERC DECISION

According to the ERC Rules of Procedure, an ERC Decision cannot be amended without abrogating the existing one. Therefore, there is a need for a separate ERC Decision to allow for free circulation and use of EMS-PRODAT terminals.

**ERC Decision
of 20 March 1998**

**on free circulation and use of EMS-PRODAT terminals
in CEPT member countries
enlarging the field of application of ERC/DEC/(95)01**

(ERC/DEC/(98)03)

The European Conference of Postal and Telecommunications Administrations,

considering:

- a) that ERC/DEC/(95)01 provides for free circulation and use of a limited number of radio equipment categories;
- b) that EMS-PRODAT is a mobile communications system, having a regional European coverage area, which by means of a satellite connection can provide low bit rate data communications;
- c) that the terminals are capable of operating in the frequency bands 1525-1559 MHz (space-to-earth) and 1626.5-1660.5 MHz (earth-to-space) under the control of the satellite system;
- d) that EMS-PRODAT terminals also fulfil the conditions for free circulation and use under the general principles of ERC/DEC/(95)01;
- e) that the band 1660-1660.5 MHz is allocated to the mobile satellite service (earth-to-space) and to the radio astronomy service on a primary basis whereas No. S.5.376A¹ of the Radio Regulations specifies that mobile earth stations in the band 1660-1660.5 MHz shall not cause harmful interference to stations of the radio astronomy service;
- f) that the satellite system limits the frequency use of the terminal in accordance with the frequency allocations of the ITU Radio Regulations, the requirements of national administrations and the co-ordination agreements with other satellite systems, which are agreed between administrations and which are subject to annual spectrum-sharing reviews between the satellite operators;

DECIDES

1. that administrations shall allow the free circulation and use of EMS-PRODAT terminals under the same conditions, in the same form and following the same procedures as laid down in ERC/DEC/(95)01;
2. that this Decision shall enter into force on 1 April 1998;
3. that administrations shall communicate the national measures implementing this Decision to the ERC Chairman and the ERO when the Decision is nationally implemented.

Note:

Please check the ERO web site (www.ero.dk) under "Documentation / Implementation" for the up to date position on the implementation of this and other ERC Decisions.

¹ No. S.5376A will only enter into force on 1 January 1999
