

**Recommendation T/R 21-04 (Malaga-Torremolinos 1975)****TRANSMITTER-RECEIVERS FOR PERSONAL USE BY THE GENERAL PUBLIC  
ON COLLECTIVE FREQUENCIES IN BAND 220-235 MHz**

Recommendation proposed by the "Radiocommunications" Working Group T/WG 3 (R)

*Text of the Recommendation adopted by the "Telecommunications" Commission:*

"The European Conference of Postal and Telecommunications Administrations,

*considering*

- (a) that in a country in Region 2, the possibility of opening part of the 220-235 MHz band to fixed and mobile services for the private use of transmitter-receivers by the general public on collective frequencies is currently being examined,
- (b) that such use is likely to result in a great number of similar requests in CEPT countries,
- (c) that this use would not be compatible with the existing allocations of frequencies in CEPT countries,
- (d) that it is advisable to take common measures in order to avoid the use of such equipment in this part of the spectrum,

*recommends*

- 1. that member Administrations of the CEPT should not permit in their respective countries the use by the general public of transmitter-receivers operating in the 220-235 MHz band,
- 2. that in so far as national legislation or regulations permit, the importation and sale of equipment of this type operating in this band should be prohibited."
