

Recommendation T/R 70-02 (Vienna 1982)

MEASURES REQUIRED TO PREVENT UNLAWFUL USE OF RADIO EQUIPMENT

Recommendation proposed by the "Radiocommunications" Working Group T/WG 3 (R)

Text of the Recommendation adopted by the "Telecommunications" Commission:

"The European Conference of Postal and Telecommunications Administrations,

considering

- (a) that the unlawful use of radio equipment has increased considerably over the last few years,
- (b) that the unlawful use of radio equipment presents Administrations with regulatory and technical problems,
- (c) that the unlawful use of radio equipment is a potential source of interference for radio services operating legally,
- (d) that it is in the interest of duly authorized users that the unlawful use of radio equipment be suppressed,

recommends

that CEPT members take the necessary action to introduce into their legislation regulations:

1. Requiring that all natural or legal persons placing radio equipment on the market ensure that such equipment conforms to the regulations and technical requirements in force,
2. Prohibiting the possession, use, import, sale or distribution of radio equipment which does not conform to the relevant regulations and technical requirements,
3. Prohibiting the sale or supply of equipment to persons not possessing a licence issued by an Administration where such a licence is required under national legislation."
