EXECUTIVE SUMMARY

This ECO Report presents the most recent information available to the European Communications Office (ECO) on the licensing of the following frequency bands in CEPT countries:

- 694-790 MHz
- 790-862 MHz
- 880-915 MHz / 925-960 MHz
- 1427-1452 MHz / 1492-1518 MHz
- 1452-1492 MHz
- 1710-1785 MHz / 1805-1880 MHz
- 1900-1980 MHz / 2010-2025 MHz / 2110-2170 MHz
- 2300-2400 MHz
- 2500-2690 MHz
- 3400-3800 MHz
- 24.25-27.50 GHz

The information in this ECO Report is updated via the EFIS database by the CEPT administrations directly.

INTRODUCTION

This ECO Report presents the most recent information available to the European Communications Office (ECO) on the licensing of the following mobile frequency bands in CEPT countries:

- 694-790 MHz
- 790-862 MHz
- 880-915 MHz / 925-960 MHz
- 1427-1452 MHz and 1492-1518 MHz
- 1452-1492 MHz
- 1710-1785 MHz / 1805-1880 MHz
- 1900-1980 MHz / 2010-2025 MHz / 2110-2170 MHz
- 2300-2400 MHz
- 2500-2690 MHz
- 3400-3800 MHz
- 24.25-27.50 GHz

The frequency bands listed above are regarded in this ECO Report as 'mobile' since they are used for mobile systems such as GSM, UMTS, LTE or 5G NR in many CEPT countries. However, this report does not designate these bands to mobile systems, and it does not establish any priority of mobile systems over any other systems or applications which may be deployed in these bands.

The list of bands included in the Report is updated regularly based on ECC harmonisation activities. In 2018 the 26 GHz band (24.25-27.5 GHz) was added to the list to allow for inclusion of information on 5G authorisations in this band according to ECC Decision (18)06.

The information in this ECO Report was available for the first time in July 1998 on the ECO website (previously ERO website) as 'ERO information document on GSM Frequency Utilisation within Europe'. In that document information collected from administrations and operators concerning the frequency sub-bands licensed to GSM operators in the 900 (890-915 / 935-960 MHz) and 1800 MHz (1710-1785 / 1805-1880 MHz) bands was presented. In March 2000, information on the utilisation of the so called 'E-GSM' band (880-890 / 925-935 MHz) was added to the ERO document.

In December 2005, a similar ERO document was created for IMT-2000/UMTS. It dealt with the utilisation of the 2 GHz (1900-1980 MHz, 2010-2025 MHz and 2110-2170 MHz) and 2.6 GHz (2500-2690 MHz) frequency bands and contained information about operators and their licensed frequency blocks (both FDD and TDD) for the 2 GHz band and the actual utilisation (at the time of publication) of the 2.6 GHz frequency band.

In May 2008, following the decision of the 29th ECC PT1 meeting (14-16 May 2008, Dublin, Ireland), the two documents on GSM and UMTS were merged into the 'ERO document on the use of mobile bands' where information on the used technologies in specific frequency bands became optional. Until 2010 this document was updated once a year on the basis of the information collected from CEPT administrations in response to the regular ECO circular letter.

The 26th ECC meeting (21-25 June 2010, Baden, Switzerland) reviewed the status of this document based on the information provided by ECC PT1 and decided that it should be maintained as an ECO Report and that the title of the document should be aligned with its content. The 36th ECC PT1 meeting (14-16 September 2010, Tallinn, Estonia) endorsed the proposal from the Office to rename the document "ECO Report on the Licensing of 'Mobile Bands' in CEPT". Since 2015, the ECO Report 03 is directly updated via the EFIS database.

Moreover, please note that the current ECO Report 03 also contains licensing information on the bands 1900-1920 MHz and 2010-2025 MHz which are no longer part of the CEPT regulatory framework for MFCN

(these bands have been deleted in the amended ECC Decision(06)01). Nevertheless, it was agreed in 2015 to retain this information with the note that these bands are not part of the CEPT regulatory framework for MFCN anymore and the list of licences is only provided for information. This information is kept for the time being as a useful reference and can be removed from the ECO Report 03 once these licences have expired. No new licence information is expected to be added for these bands.

Annex 1 of this ECO Report contains the most recent national information available to the ECO on the licensing of the mobile frequency bands listed above.

Annex 2 of this ECO Report contains templates for various mobile frequency bands which should be used by administrations for submitting national information to the ECO.
